Plastic Tanks

ProChem® Chemical & Agricultural Tanks 25 Gallons up to 1500 Gallons

ProChem® Tanks, available in linear and crosslink polyethylene, are designed for agricultural and industrial chemical applications where a single-walled design is desired. Most Tanks include an integrally molded pump mounting platform on top and standard process fittings for fill and discharge of chemicals, water or food products. Supplied with a vented access opening and easy to read calibration in liters and gallons, the ProChem® Tank offers standard features not previously available anywhere. ProChem® Polyethylene Tanks are ALS Group USA, Corp. NSF/ANSI/CAN 61 Certified.

ProChem® Process Chemical Tanks are also available in PPL and PVDF (*Kynar®).

Plastic Tanks

ProChem® Potable Water Tanks 25 Gallon up to 1500 Gallons

ProChem® Potable Water Polyethylene Tanks include an integrally molded pump mounting platform on top and standard process fittings for fill and discharge of water. Supplied with a large vented access opening and easy to read calibration in liters and gallons, the ProChem® Potable Water Tank offers standard features not previously available. Offered in Natural and Opaque Black rated for water storage only. ProChem® Polyethylene Tanks are molded with FDA approved material and ALS Group USA, Corp. NSF/ANSI/CAN 61 Certified. Rated for 1.0 Specific Gravity – Water Only.

For Tank Fittings see section starting on page 24 for options.

Plastic Tanks

ProChem® Tank & Basin & FRP Grating Combo Kits

ProChem® Basins are designed to provide secondary containment for tanks. They meet or exceed EPA's 40 CFR secondary containment requirements.

These economical open containment basins are designed for one or two tanks (depending on model) and are available with or without a base made of corrosion-resistant fiberglass grating to keep your tanks above liquids and sediment that may accumulate in some installations. Made from rugged polyethylene with ultra-violet inhibitors, ProChem® Basins will last for many years in the harshest chemical environments.

Plastic Tanks

ProChem® Open Top Tanks LPE, XLPE, PPL, PVDF - Lid Included 5 Gallons up to 500 Gallons

Cylindrical open top tanks are available in linear (LPE) and crosslink (XLPE) polyethylene materials and include dust cover style lids. Translucent natural is the standard color, but they are also available in Gemini Blue or Black for a 10% adder. Other custom colors available on request. Flat area on sidewall with molded-in calibration showing level in gallons and liters, Blackened-in lettering is available at additional cost. Tank diameter does NOT include top rim flange. Height is from floor to top of lid. Open Top Tanks with LPE construction are ALS Group USA, Corp. NSF/ANSI/CAN 61 Certified in all sizes. XLPE tanks are NSF/ANSI/CAN 61 Certified in sizes from 55 - 500 gallons.. ProChem® Open Top Tanks are also available in Polypropylene (PPL) and PVDF (Kynar). Contact customer service for pricing.

For Lid options such as Shoebox Hinged and Bolted Sheet Hinged go to page 78.

Plastic Tanks

ProChem® Solid Top Tanks LPE, XLPE, PPL, PVDF 5 Gallons up to 500 Gallons

Our Cylindrical Tanks are also available with solid tops and equipped with a threaded twist lid for applications where a removable cover is not desired. Other than the solid cover, all other features are the same as our Open Top Tanks. Solid Top Tanks with LPE construction are ALS Group USA, Corp. NSF/ANSI/CAN 61 Certified in all sizes. XLPE tanks are NSF/ANSI/CAN 61 Certified in sizes from 55 - 500 gallons. Also available in PPL and PVDF (Kynar). Contact customer service for pricing.

ProChem® Open Top Rectangular Tanks LPE - 86 Gallons

Open Top Rectangular Tanks are great for applications where you need full access to the tank interior for applications like dipping, plating, cleaning filters or containing liquids. We offer a standard 86 gallon rectangular, but we have other sizes available. Please call customer service for help on special applications. Covers for open top rectangular tanks are sold separately. Tanks with LPE construction are ALS Group USA, Corp. NSF/ANSI/CAN 61 Certified. Flat covers available, call for pricing.

Plastic Tanks

ProChem® Square Tank

The ProChem® 140 Square tank is designed to fit in applications with limited space. The innovative ribbed design reduces sidewall deflection normally encountered on flat sided tanks. A 16" threaded twist lid and molded in calibration in gallons and liters is standard. Process fittings are available at additional cost. This tank is available in 1.0 (water weight), 1.5 and 1.9 specific gravity ratings, as well as XLPE 1.9 rated, NSF/ANSI/CAN 61 Certified. If you have an application that requires a PPL or PVDF version, call customer service for pricing.

For Tank Fittings see section starting on page 24 for options.

Plastic Tanks

ProChem® Rectangular Tanks

Great for Auto Detail, PCO Applications, Graffiti Removal, OEM Applications.

Rectangular tanks will fit many applications where a compact tank is desired. They are ideal for truck, van and trailer mounted applications, where there is a need to integrate a tank into a system with pumps, filters, valving, etc. Not for use with fuels, solvents or other flammable liquids. Tie Down straps are available on request for an additional charge, or you can use ratchet-style cargo straps rated for the appropriate weight rating, which are available at most hardware stores. All of our rectangular tanks (except the 330 gallon model) can be oriented in any position, so any side can be the top. 8" twist lid* included in price. Molded in LPE and NSF/ANSI/CAN 61 Certified. The tanks are rated for 1.0 SPG, 1.5 SPG LPE is standard, but these tanks are also available in XLPE, PPL and PVDF materials.

Stands are available as options. Ask customer service if you are interested.

ProChem® Cone Bottom Tanks - 60° Slope

Tanks have a 60° cone slope and a closed top with 8" twist lid standard. Translucent white 1.5 SPG rated LPE is standard. LPE tanks are ALS Group USA, Corp. NSF/ANSI/CAN 61 Certified, XLPE Tanks 25 gals and up are also NSF-61 certified. Also available in XLPE, PPL and PVDF. Custom colors available.

Fittings and accessories are available as options - starting at page 80.

See Tank Lid section for optional lid choices starting on page 78.

Tanks can be customized for specific applications, like adding a pump mounting platform, agitation, valving, process controls, etc. Contact Customer Service for assistance.

Plastic Tanks

ProChem® Cone Bottom Tanks - 30° Slope

ProChem® Cone Bottom Tanks are designed for storage of water or chemical solutions where batching, mixing or full drainage might be required. 30° cone slope allows for optimum mixing and better overall drainage, particularly with solids and viscous liquids..

Available in Standard Duty for liquids up to 1.5 Specific Gravity (12 ½#/gal.) or Heavy Duty for liquids up to 1.9 Specific Gravity (16#/gal.) with or without integrally molded plastic stand. Designed for atmospheric pressure and ambient temperature applications. Large 8" vented twist lid* is standard, 16" available on 500. Drain and process fittings are not included but available in various sizes and styles. Process fittings and other options are available. Steel, Stainless Steel or FRP Stands are available in standard and seismic designs as required. Tanks are ALS Group USA, Corp. NSF/ANSI/CAN 61 Certified. Contact customer service for application assistance.

Gemini Dual Containment® Tanks

Cylindrical

15 Gallons up to 500 Gallons

Square

5 Gallons up to 175 Gallons

Features & Benefits of Gemini Dual Containment® Tank Systems

- Standard Linear polyethylene (LPE) or Crosslink polyethylene (XLPE) construction provides superior chemical resistance for acids, caustics, sodium hypochlorite, biocides, etc. Handles aggressive applications that stainless steel will not. Also available (Polypropylene (PPL) and PVDF.
- All Peabody Gemini® tanks made from LPE are available ALS Group USA, Corp. NSF/ANSI/CAN 61 Certified. In Natural (translucent white) or Gemini Blue. XLPE NSF/ANSI/CAN 61 Certified from 40 gallons up.
- Durable dual wall construction - Standard tanks available in 1.5 SPG and 1.9 SPG. "Tank in a Tank" design for instances where primary tank fails, the chemical will be safely contained in secondary tank.
- NEW Standard secondary tank leak detection port - for optional leak detection alarm.
- Integral Pump Mounting Platform on dome on most models – Rated for pumps up to 240 pounds. Models with sump reservoir collects and drains liquid back into primary tank (if plug is removed).
- Pump pick-up tube port - Install pump suction line with foot valve quickly and easily. Once installed, tank contents are sealed from outside environment. See page 25 for optional Gemini Pump Suction Tube assembly with foot valve pre-configured for all Gemini tank sizes.
- Integral mouse door - Molded directly into most Gemini models, recessed mouse door allows for inexpensive installation of optional dual wall bulkhead fitting for flooded suction and bottom fill applications. (fittings sold separately).
- Custom colors, mold-in company logos and custom labeling available as options subject to minimum quantity order. Private label mold-in graphic is molded directly into tank and won't weather, crack, peel, or deteriorate.
- All of our tanks meet or exceed the EPA's requirements for secondary containment under EPA Regulation 40 CFR.
- For a wide range of Gemini® Accessories see Fittings & Parts starting on page 24.

Ribs are only on outer Gemini® Square Ribbed tanks, they are not designed for use in lifting tank with a forklift. Inner tanks have straight sidewalls.

Plastic Tanks

Gemini® PLUS

Our Gemini® PLUS Double Walled Chemical process and storage tank 1300-gallon size is designed with all the integral design features you need to make it simple and affordable to customize your tank for even the most demanding applications.

The Gemini® PLUS 1300 is also available ASTM D-1998 rated and is available in LPE, XLPE, PPL or PVDF construction. Tanks made from Linear Polyethylene (LPE) and XLPE are ALS Group USA, Corp. NSF/ANSI/CAN 61 Certified.

The base tank includes a large 16" OD threaded and vented access manway, heavy-duty D-ring lifting lugs and provisions for easy attachment of standard ladders, truck fill lines, top or bottom discharge assemblies, level and leak detection, seismic restraint packages and more. The Gemini® PLUS can be pre-fitted to your specifications at the factory or easily retro-fitted in the field.

J	2" Top Suction Line with Dip Tube: includes 2" PVC union, 2" PVC dip tube, 2" PVC spring check valve, 2" polyethylene suction screen.	02-32872
K	Interstitial Leak Detection System: includes Battery powered, float style sensor with audible and visual alarm. Epoxy coated enclosure, PPL float, PVC coated cable	24-32262
L	2" Top Extra Vent: includes 2" PPL/EPDM bulkhead fitting and a PPL mushroom vent with poly screen	02-32873
M	(2) 3P Document Protectors, to be installed by customer in locations of choice	02-31945
N	2" Top Auxiliary Outlet: 2" PVC/EPDM bulkhead fitting installed on top tank pedestal, location to be decided.	02-32874
O	CAD submittal drawings: show all accessories on tank (not shown on drawing)	272-32875

Plastic Tanks

Gemini² MCU Multiple Chemical Unit

STORE MULTIPLE CHEMICALS IN A SINGLE, MULTI-COMPARTMENT DUAL CONTAINMENT TANK.

Configure two, three, or four different liquids in one compact space, with 2 separate containment chambers that is as flexible as you need it to be. The Gemini² MCU™ (Multiple Chemical Unit) has individual primary Tanks available in 6 and 12-gallon sizes. Configure your tank with (2) 12-gallon tanks, (1) 12-gallon and (2) 6-gallon tanks or (4) 6-gallon tanks, all in one compact space. Great for Biocide/Inhibitor set-ups, Pool Chemical feed systems or any other application where you require multiple chemicals with limited space for storage.

An optional overhead PumpDeck™ can be integrally mounted to the MCU™ with room for up to 4 metering pumps. The PumpDeck™ is designed to contain pump drips or minor spills that will drain back into the correct tank and can also be equipped with an alarm that will warn you of leaks in both the shelf and/ or the interstitial space before it's a problem.

- Takes up only a 25" square footprint of space x 27" in height, 47" in height with PumpDeck™.
- Can be configured for 2, 3, or 4 containers.
- An overhead PumpDeck™ option is available.
- Tank and PumpDeck™ leak detection system is available with flashing strobe and audible alarm.
- An optional funnel is also available for easy filling from a pail or carboy see page 66.
- Available in LPE, XLPE, PPL or PVDF for a wide range of chemical compatability.
- Tank can be supplied with a combination of blue and natural tanks (or other colors) for easy visual identification of different chemicals.

Plastic Tanks

Assembly #1 PN 01-31895 | (2) 12 Gallon Tanks

Option with PumpDeck™

Without PumpDeck™

This model consists of (2) 12 Gallon Primary Tanks in Isolated Secondary Containment Chambers. Optional colors of each tank may be selected by part number below. For model with PumpDeck, add PumpDeck part number.

Assembly #2 PN 01-31896 | (1) 12 Gallon & (2) 6 Gallon Tanks

Option with PumpDeck™

Without PumpDeck™

This model consists of (1) 12 Gallon and (2) 6 Gallon Primary Tanks in (2) Isolated Secondary Containment Chambers. Optional colors of each tank may be selected by part number below. For model with PumpDeck, add PumpDeck part number.

SECONDARY TANK ACCESS

PUMP SUCTION CONNECTION

Assembly #3 PN 01-31897 | (4) 6 Gallon Tanks

Option with PumpDeck™

Without PumpDeck™

This model consists of (4) 6 Gallon Primary Tanks in (2) Isolated Secondary Containment Chambers. Optional colors of each tank may be selected by part number below. For model with PumpDeck, add PumpDeck part number.

Showing a Gemini® Suction Tube with 2" Caplug Option

Gemini® Suction Tube Assemblies are intended to be used with Chemical Feed Pumps.

For manual and electronic Level indication and controls, see page 65.

Tank Accessories

3P Weather-Resistant Document Protectors

Place your important documents in any location, quick and easy.

- 📄 The 3P Document Protector is available in 4 standard sizes
- 📄 Made from a durable nylon/polyethylene laminate that provides superior moisture resistance and strength.
- 📄 Heavy-duty “zip-seal” closure, allows the placement of documents inside the secure enclosure quickly and easily!
- 📄 Super strong Duraco high bond adhesive tape on back, allows the enclosure to be easily placed on almost any surface.
- 📄 The versatile 3P Document Protector can be placed in the vertical “portrait” position, or on horizontal “landscape” position, whatever works best in each application.

Place and Protect

Caution/Safety signage for chemical tanks, valves and pumps. Works great on plastic, fiberglass, and metal tanks.

Chemical labeling information or SDS sheets can be affixed directly to your chemical tanks for quick and easy compliance.

Announcements, calendar, evacuation maps and safety safety procedures can be conveniently placed in offices, lunch rooms and common areas.

Tank Accessories

I.D. signs for first aid supplies, emergency eyewash units, Safety Notices and Warnings, etc.

Operating Permits, Licenses and Maintenance Schedules for air compressors and any other machinery. Also works great for placing cautionary labeling near equipment.

Operating instructions/manuals can be located and stored safely and conveniently near any equipment, even on forklifts and other mobile equipment.

02-31945

- 📄 Temporary signs for parties or other announcements.
- 📄 Clean, neat, easy to use and very cost effective.

Pre-Configured Engineered Tank Value-Paks

Single Wall Value-Paks

Single Wall Tanks are manufactured from a high purity FDA approved HDPE (High Density Linear Polyethylene) resin. HDPE tanks have superior chemical resistance, extreme durability and excellent UV stabilizers, making them an ideal choice for a wide range of applications from food processing and semiconductor to heavy duty industrial chemical storage. All of our tanks are also NSF 61 compliant.

HDPE resins are weldable, allowing for installation of welded process nozzles from 1/2" to 14" and larger if required.

Our tanks are rated for temperatures up to 120°F and higher with special upgraded enhancements upon request.

Our standard tanks are rated for 1.5 Specific Gravity contents.

We offer 1.9 SPG tanks upon request.

Tank Packages designed with our most popular options making Single Wall Tank Systems simple, feature rich and easy to order.

Silver Pak Features

Key ID #	Part	Silver Description
-	Plastic Bulkhead Fittings	Choice of PVC or PPL. Plastic fittings won't corrode over time and are very durable
-	CAD Drawings	CAD Submittal Drawings are provided to ensure the tank meets the needs of your application.
-	Shipping Prep	Includes heavy duty shrink wrap to protect your tank from the elements during transit
1S	18" OD Lid	Standard vented twist lid vents up to 450 gallons per minute during discharge or filling
2S	2" Fill	FPT fill connection high on tank sidewall
3S	2" Drain with Ball Valve	Bolted style polypropylene ball valve screws into 2" Drain for secure on/off draining

Pre-Configured Engineered Tank Value-Paks

Gold Pak Features

Key ID #	Part	Gold Description
-	Silver Features	All features of Silver Pak are included with the following changes/additions
-	Polyethylene Welded Flanges or Couplings*	All Gold Tank's fittings are extrusion welded and gasketless. Welded fittings provide for industrial grade reliability for all of your tank connections. Made from 100% polyethylene, these fittings are all custom fabricated for optimum performance and chemical resistance
1G	Lifting Lugs	Zinc plated lifting lugs allow quick installation of tank by attaching and hoisting tank into position
2G	Drop Fill Line	Installed into Silver 2" Fill (2S), 42" up from the ground level for easy filling of tank. Includes ball valve, check valve, and PPL quick coupler and cap
3G	Inverse Level Gauge	Standard with fiberglass encapsulated calibration chart in gallons to easily check fluid level from exterior of tank
		*If desired, Stainless Steel Bulkhead fittings can be substituted at no additional cost

Platinum Pak Features

Key ID #	Part	Platinum Description
-	Silver and Gold Features	Platinum Pak includes all features of Silver and Gold Pak plus those seen and listed below (FRP Ladder)
1P	FRP Ladder	FRP Ladders are OSHA compliant, corrosion resistant and attaches directly to tank for easy top access. All ladder systems come with required hardware included.

Additional Single Wall Features and Adders

Additional options including seismic restraint systems, heating and insulation, side manways, level control, process fittings, etc. are available on all models, at an additional cost.

Pre-Configured Engineered Tank Value-Paks

Double Wall Value-Paks

Silver Pak

Gold Pak

Platinum Pak

Double Containment Tanks are manufactured from a high purity FDA approved HDPE (High Density Linear Polyethylene) resin. HDPE tanks have superior chemical resistance, extreme durability and excellent UV stabilizers, making them an ideal choice for a wide range of applications from food processing and semiconductor to heavy duty industrial chemical storage. All of our tanks are also NSF 61 compliant.

HDPE resins are weldable, allowing for installation of welded process nozzles from 1/2" to 14" and larger if required. HDPE allows us to weld our DCS Double Walled Tank Systems together, making them a true one-piece double walled containment system.

Our tanks are rated for temperatures up to 120°F and higher with special upgraded enhancements upon request.

Our standard tanks are rated for 1.5 Specific Gravity contents. We offer 1.9 SPG tanks upon request.

Tank Packages designed with our most popular options making Dual Containment Tank Systems simple, feature rich and easy to order.

Silver Pak Features

Key ID #	Part	Silver Description
-	Plastic Fittings	Your choice of PVC or PPL. Plastic fittings won't corrode or rust over time and are very durable
-	CAD Drawings	CAD Submittal Drawings are provided to ensure the tank meets the needs of your application
-	Shipping Prep	Includes heavy duty shrink wrap to protect your tank from the elements during transit
1S	2" Mushroom Vent	(2) Vents installed for interstitial venting
2S	2" Top Drain Outlet	FPT drain connection with diptube allows for quickly emptying primary tank
3S	2" Overflow	In case primary capacity is exceeded, liquid drains into interstitial secondary space
4S	18" OD Lid	Standard vented twist lid vents up to 450 gallons per minute during discharge or filling
5S	2" Fill	FPT fill connection high on tank sidewall
6S	1" Drain with Plug	Drain for secondary containment interstitial space, without disrupting liquid being held in primary. Optional shut off valve available

Pre-Configured Engineered Tank Value-Paks

Gold Pak Features

Key ID #	Part	Gold Description
-	Silver Features	All features of Silver Pak are included with the following changes/additions
-	Polyethylene Welded Flanges or Couplings*	All Gold Tank's fittings are extrusion welded and gasketless. Welded fittings provide for industrial grade reliability for all of your tank connections. Made from 100% polyethylene, these fittings are custom fabricated for optimum performance and chemical resistance
1G	Lifting Lugs	Zinc plated lugs allow quick installation of tank by attaching and hoisting tank into position
2G	Leak Detector	Optical leak detector alerts you of possible leak in secondary interstitial containment space
3G	Drop Fill Line	Installed into Silver 2" Fill (5S), 42" up from the ground level for easy filling of tank. Includes ball valve, check valve, and PPL quick coupler and cap
4G	Inverse Level Gauge	Standard with fiberglass encapsulated calibration chart in gallons to easily check fluid level from exterior of tank

*If desired, Stainless Steel Bulkhead fittings can be substituted at no additional cost

Platinum Pak Features

Key ID #	Part	Platinum Description
-	Silver and Gold Features	Platinum Pak includes all features of Gold Pak plus those seen and listed below (FRP Ladder and Side Access Box)
1P	FRP Ladder	FRP Ladders are OSHA compliant, corrosion resistant and attaches directly to tank for easy top access. All ladder systems come with required hardware included.
2P	Side Access Box	Peabody Engineering's unique Side Access Box has a clear cover for visual interstitial leak detection. The flex-hose interconnection system allows for safe movement between the tank walls without putting stress on the lower drain outlet.

Additional Double Wall Features and Adders

Additional options available on all models, including seismic restraint systems, heating and insulation, fiberglass wraps, level control, process nozzles, etc. are available at an additional cost.

Key ID #	Part	General Items Included with all ValuePaks
-	Plastic Fittings	Your choice of PVC or PPL. Plastic fittings won't corrode or rust over time and are very durable
-	CAD Drawings	CAD Submittal Drawings are provided to ensure the tank meets the needs of your application
-	Shipping Prep	Includes plastic wrap and palletizing to protect your tank from the elements during transit
Key ID #	Part	Silver Description
1S	Float Gauge	Stainless Steel Float Level Gauge. (PVDF Float Gauge available call for pricing.)
2S	Pump Pup (not including Pump)	Pump Pup Pump Pedestal to elevate your pump enough to allow for “easy” suction tubing connection
3S	1” Fill Inlet with Quick Coupler	1” QCA fill connection – includes male cam adapter and dust cap with lanyard
4S	Gemini Pump Suction Tube with Foot Valve	Gemini Pump Suction Tube with foot valve to make your chemical feed suction connection very easy
5S	3P Document Protector	3P Document Protector to attach important documents on the side of your tank, like safety info, SDS, etc.
Key ID #	Part	Gold Description
-	Silver Features	Includes Following Silver Features: 2S, 3S, 4S, 5S
1G	Double Wall Welded Bottom Drain Fitting	1” FTP connection Double wall welded bottom drain fitting installed (for flange call Customer Service)
2G	HD Spinweld Fitting with Plug	1” HD Spinweld Fitting with plug
3G	Mini-Inverse Level	Mini-inverse Level Indication with 2” wide calibration board
4G	Non-Code Steel Hold Down Lugs	Non-Code Steel hold down lugs (except for 160 gal which has a FiberRing)
Key ID #	Part	Platinum Description
-	Silver and Gold Features	Platinum Pak includes Silver Features: 2S, 3S, 4S, 5S and all Gold Features
1P	Interstitial Leak Detection Sensor	Interstitial Leak Detection Sensor (Alarm Box optional call for pricing)
2P	Submersible Level Sensor	Submersible level sensor + display and 4-20 mA signal output, 24 VDC powered

Pre-Configured Engineered Tank Value-Paks

Gemini Dual Containment® Square Value-Paks

We just made it easier for you to order our popular Gemini double walled tank systems with a variety of added features and benefits. Choose from a Silver Pak if you only want to add a couple of extra features, a Gold Pak, for even more and a Platinum Pak, if you would like to have a very “feature rich” Gemini tank package!

Optional features:

- Upgraded seismically compliant FiberRing restraint systems with certified engineering.
- ProChem® flexible heating blanket systems.
- Tank stands.
- Mixer mounting systems.
- Additional Adders and Options including heating and insulation, level control, process fittings, etc. are available on all models, at an additional cost.

Refer to table of contents in front of catalog or Index in back of catalog to find these items.

Name Plates & Stenciling & Hydrotesting

Name Plates & Stenciling

If you would like to add a custom nameplate on your tank, all you have to do is provide us with details and we will make one for you. Our nameplates are made of durable weather-resistant FRP encapsulated labels mounted to a sheet of polyethylene and welded to your linear polyethylene tank. For XLPE Tanks, the Name Plates are mechanically attached with stainless steel hardware. If you have a fiberglass wrap on your tank, we can laminate the nameplate right into the tank sidewall. Available in 3 standard sizes. Custom Nameplates quoted upon request. If you would like Stenciling on your tank, we offer 2" spray on Letters and Numbers with whatever you want printed in 12 max characters per line.

Description	Part #
FRP Encapsulated Nameplate for LPE Tank up to 9" x 12"	272-34475
FRP Encapsulated Nameplate for LPE Tank up to 12" x 18"	272-34476
FRP Encapsulated Nameplate for LPE Tank up to 18" x 24"	272-34477
FRP Encapsulated Nameplate for XLPE Tank up to 9" x 12"	272-34478
FRP Encapsulated Nameplate for XLPE Tank up to 12" x 18"	272-34479
FRP Encapsulated Nameplate for XLPE Tank up to 18" x 24"	272-34480
2" Spray-on Stenciling - 12 characters per line Maximum	272-34481
Additional Line of 2" Stenciling - up to 12 Characters	272-34482

Hydro Testing

Hydrotesting is available for any of our tanks. We offer 4-hour and 24-hour testing depending upon your requirements. Hydrotest certification included with Testing. Please refer to the table below for ordering information.

Tank Capacity (Gallons)	Part #
4-Hour Hydrotest - Tanks up to 500 Gallons	272-34483
4-Hour Hydrotest - Tanks from 501-2500 Gallons	272-34484
4-Hour Hydrotest - Tanks from 2501-6500 Gallons	272-34485
4-Hour Hydrotest - Tanks from 6501-15,500 Gallons	272-34486
24-Hour Hydrotest - Tanks up to 500 Gallons	272-34487
24-Hour Hydrotest - Tanks from 501-2500 Gallons	272-34488
24-Hour Hydrotest - Tanks from 2501-6500 Gallons	272-34489
24-Hour Hydrotest - Tanks from 6501-15,500 Gallons	272-34490

Fiberglass Rectangular Process Tanks

Open Top Rectangular Tanks

Peabody manufactures fiberglass rectangular tanks in a variety of sizes to fit a wide array of industrial and commercial applications including:

- Plating Dip Tanks
- Open Top Batch and Process Tanks
- Horticulture Tanks
- Planter Liners
- Hydroponics Tanks
- Greenhouse Tanks
- Secondary Containment Tanks

We offer standard open and closed top models in sizes from 50 gallons to 950 gallons in standard configurations, with or without plastic liners. Other capacities and configurations available upon request.

Capacity	Dimensions	Wall	Rib	Polyester PN	Vinylester PN

Options and Accessories

- Extra tank fittings
- Lifting lugs
- Hold down lugs
- Insulation
- Heat tracing
- Mixer and equipment mounting brackets
- Stands
- Seismic restraint engineering
- Baffles
- Level indication and control
- Temperature sensors
- Spargers, dip tubes and fill lines

Special Application design and engineering assistance available for Custom Projects. Contact us for assistance.

Pump & Equipment Enclosure Products

PCS Pump Containment Enclosures

Polyethylene material allows for a wide chemical compatibility and is corrosion resistant. Cover contains pumps/meters safely inside enclosure and protects workers and environment from accidental leaks or spray from tubing or pumps. Optional Divider isolates pumps with different chemicals to allow for separate containment and minimize contamination from mixed chemicals.

Built-in reservoir/sump collects all discharged liquids and has an integral drain outlet allowing sump to be easily emptied back into a tank, pail, sump, etc. Limited containment capacity is designed to connect to drain pipe for proper containment compliance.

Available standard in blue or natural (custom colors available by special request). Price includes (4) steel brackets for wall or deck mounting. Custom company graphics can be added for increased brand awareness. Optional security bolt prevents unauthorized access to contents.

Pump & Equipment Enclosure Products

PCS Pump Containment Enclosures - continued

Additional Details

- Integral sidewall openings for suction, discharge and electrical connections.
- 3 Models available to comfortably fit 1, 2 or 3 pumps with enough room to service and adjust pumps as needed.
- Room for optional pump controller.
- Molded-in external mounting holes for secure mounting and centering to walls, studs or any level surface.
- Modular design allows for mounting shelves in series for multi-pump installations.
- Strong enclosure with a 240 pound load rating.
- Hinged cover for easy access to your pumps and equipment.

Pump Turtle

The Pump Turtle™ is a pump containment enclosure designed to keep your products safe and secure in field or in-plant chemical applications. This cost-effective enclosure holds a single chemical metering pump and is constructed of UV stabilized and chemical-resistant linear polyethylene for longevity in harsh chemical and weather environments. Limited containment capacity is designed to connect to drain pipe for proper containment compliance. Other colors available on request

Description	L x W x H	Green
Pump Turtle - 1 Pump Enclosure	18.75" x 18" x 19"	253-31434

The Pump Turtle™ lifts up and off The Pump Turtle™ Platform.

For more information on the Pump Turtle Pump Skid see page 50.

Pump & Equipment Enclosure Products

PCS-PLUS 2

Introducing our Exciting **NEW** Secondary Containment Pump/Equipment Enclosures PCS-PLUS 2 and PCS-PLUS 4. The Ultimate enclosures for a variety of pumps and equipment that you may need Secondary Containment for in a safe, secure, weatherproof and lockable cabinet.

Plus Enclosures are designed with extra room to handle not only chemical feed pumps, but any pump that will fit inside, weighing up to 500 pounds or more. They will also accommodate multiple pumps, controllers, piping manifolds and anything else where you need safe, secure storage.

PLUS you can use them for:

- 🔧 Pump Controllers
- 🔧 Sampling Stations
- 🔧 Tank and Drum Storage
- 🔧 Coupon Racks
- 🔧 Piping Manifolds
- 🔧 Hazardous Waste Collection Stations

**Showing Optional
Controller Plate Large
PN 02-33824**

(controller and other
parts not included)

PCS-PLUS 2

PCS-PLUS 2 Features & Benefits:

- 🔧 Front opening doors for easy access to pumps.
- 🔧 Hinged top hood for ease in servicing internal equipment.
- 🔧 Bottom Suction port for vertical insertion of tubing into your feed pumps.
- 🔧 Integral Hinge design with all non-metallic corrosion-resistant components on front doors and top lid.
- 🔧 Dual Windows for easy visual assessment of pumps inside.
- 🔧 Integral Anchoring Connections on bottom and sides.
- 🔧 Lockable front doors to secure your equipment from unauthorized access.
- 🔧 Integral Mounting Supports for Coupon Racks and Piping Manifolds.
- 🔧 Standard mounting plate for installation of your pump controller inside.
- 🔧 Enhanced bottom sump drain connection For proper compliance in capturing spills.
- 🔧 Optional climate control devices including internal circulation fan, heaters and air conditioners.

**Optional FRP or Aluminum Stand
for PCS-PLUS 2**

Pump & Equipment Enclosure Products

PCS-PLUS 4 Features & Benefits:

-  Large footprint – 44" x 52" base dimensions and 4000# uniform loading capacity – allows for a large pump or multiple pumps in a safe and secure enclosure.
-  66 Gallon Containment Capacity with optional drain for overflows – Allows for EPA-Compliant storage of up to (2) 55-gallon capacity drums or 60 gallon tanks.
-  Sturdy back wall for mounting of pipe manifolds, control panels, coupon racks, calibration columns, Optional Uni-Strut mounting package for easy attachment of pipe manifolds and more.
-  Flexibility in piping configurations with multiple flat surfaces for installation of bulkhead fitting on sides and back of unit.
-  Great for secure storage of chemicals, Hazmat collection/response kits or other supplies in remote locations, treatment facilities, warehouses or construction sites.
-  Large swing-open doors with heavy-duty windows and liftable top hatch for easy access for installation and servicing.
-  Lockable doors keep your equipment safe and secure.
-  Forkliftable base with molded inserts for anchoring in place.
-  Standard internal grating to elevate equipment above containment sump.
-  Made of durable UV-Stabilized rotational molded polyethylene – never rusts or corrodes.
-  UV-Resistant for up to a 20-year life in outdoor installations, designed to keep rain and moisture out.
-  Temperature range from -50°F to 140°F.
-  Available in standard or custom colors with private branding options.
-  Highly chemical resistant in a wide range of chemical and corrosive environments.
-  Optional Internal Cooling Fan, Heating or Digital Air Conditioning Unit for ultimate temperature control.

Pump & Equipment Enclosure Products

PCS-PRO Fiberglass Pump and Equipment Enclosures

We are pleased to offer our **NEW** line of **PCS-PRO** fiberglass enclosures.

PCS-PRO fiberglass pump and equipment containment enclosure systems are available in (4) standard sizes, but you can order custom sizes as well, by simply adding inches to any of our standard model's dimensions.

Use the PCS-PRO enclosures for larger chemfeed pumps, peristaltic pumps, double air diaphragm pumps, multiple pumps, or other process equipment in one enclosure. Almost unlimited size options.

Standard Features:

- Front opening doors with clear windows
- (2) 2" FPT outlets on each side for piping and electrical connections
- 1" Bottom sump drain outlet with PVC plug for drainage of leaks into proper collection sump.
- Integral containment sump with grate shelf for easy pump mounting
- Integral bottom external skids to elevate enclosure off the floor or a shelf
- Std. color is gray, but other colors are available on request
- Polyester fiberglass construction is standard
- Locking doors
- Detailed CAD submittal drawings for custom projects.

PCS-PRO 4	36" x 30" x 30"	2	253-33384

Options:

- Custom colors
- Insulation, Heating, Cooling or Recirculation Fans
- Vinyl ester fiberglass construction available for more aggressive chemicals
- External mounting brackets for mounting from any side
- Integral legs to elevate enclosure to desired height
- Extra doors on sides or top
- Extra windows on sides or top
- Internal mounting brackets for coupon racks, piping, controllers, etc.
- Venting
- Lifting lugs
- Forklift slots

Circulation Fan

Compact Cooling Fans are ideal for applications where enclosure space is limited and quiet, reliable cooling is required. Engineered for 50,000 hours of continuous operation without lubrication or service. Can be installed on any surface of an enclosure. With the addition of accessory fan brackets, Compact Cooling Fans can also be installed in any position inside the enclosure for spot cooling or air circulation.

Heating Module

Protect mechanical, electrical and electronic equipment from low temperatures, condensation and corrosion with this thermostatically controlled, fan-driven heater that maintains a stable enclosure temperature.

Fan draws cool air from the bottom of the enclosure and passes this air across the thermostat and heating element before being released into enclosure cavity. Heated air is discharged through the top of the heater unit. 120VAC Powered.

Standard Features:

- Aluminum housing
- Thermostat range adjustable from 0 F to 100 F (-18 C to 38 C)
- Four 10-32 x self-tapping screws are included with each heater
- Ball bearing fan
- Terminal strip with clamp connector that accepts both solid and stranded wire

Enclosure Products Accessories

A/C Module - Features

- Two levels of corrosion protection:
 - Level 1 - Protective coatings on all exposed copper tubing and solder joints, condenser coil and thermostat.
 - Level 2 - All protective coatings in Level 1 plus a coated evaporator coil. Foam wrap added over protective coatings on thermostat.
- Narrow design accommodates 12-in. deep cabinets
- R134a earth-friendly refrigerants
- Models for 115, 230 and 400/460 VAc power input
- UL Listed to save customers time and money with agency approvals
- Attractive industrial design with minimal use of visible fasteners
- Reliable mechanical thermostat is located behind the cover of the unit; Air conditioner models include digital display on ambient side
- Galvanized sheet-metal cover for rugged factory and outdoor environments
- Easy-mount flanges for simple installation
- Dust-resistant condenser coil allows the unit to be run filterless in most applications
- Cleanable, reusable aluminum mesh filter protects coils for maximum cooling performance
- Mounting hardware, gaskets and user manual furnished with the unit
- Every unit functionally tested before shipping
- Standard models include:- Active condensate management- Power-off relay for door switch and other system requirements- malfunction switch

Pump Skids

ProChem® Pump Skids

Are you looking for a simple way to build a Chemical Feed Pump skid? We have (6) sizes to choose from. Whether you need a small skid for (1) small pump or something larger for bigger pumps or multiple pumps. Plenty of room for manifolds, coupon racks and controllers. Choose the size that best fits your application. ***Covers also available for all Bases. Contact us for more information.***

Features

- Std. colors are Natural, Gemini Blue, and Black.
- Custom colors available on request.
- Plated steel hold down angle clips standard.
- All skids are secondary containment sumps with drain outlet.
- Std. with threaded inserts for mounting pumps and accessories.

Pail Containment

PailVault™

Protect your chemicals in 5-gallon pails, Geri cans, and car boys, from costly and harmful spills with Peabody Engineering's ProChem® PailVault™, a modular chemical resistant containment enclosure that exceeds EPA's 40CFR regulations on secondary containment requirements. The PailVault's rotationally molded linear polyethylene construction provides a durable enclosure that keeps your chemicals safe and secure from chemical spills, which can cause workplace injuries and costly environmental clean-up.

Description	Blue PN	Natural PN
ProChem® PailVault™ - Standard	253-31946	253-32013
ProChem® PailVault™ - Deluxe*	253-32292	253-32293

**Deluxe Includes
(3) Tubing Seal Fittings and
(1) 3P Doc Protector*

- ☛ Rugged Chemical-Resistant LPE Construction for years of trouble-free service (Other materials available)
- ☛ Modular design allows for connection of multiple units for safe, isolated containment
- ☛ 400% secondary containment, which far exceeds EPA requirements.
- ☛ UV and weather-resistant for long service life in direct sunlight and outdoor exposure
- ☛ Integral pump suction port connection available
- ☛ Optional Rigid suction tube with foot valve and tubing connection for connection to metering pumps
- ☛ Each unit fits (1) 5-gallon pail, JeriCan or other small container
- ☛ Locking cover option with tamper-proof security screws
- ☛ Lightweight - Only weighs 12 lbs - easily handled by one person
- ☛ Compact Design - Measures 20" x 13.75" x 24" - fits in tight spaces
- ☛ Rated for temperatures up to 140 degrees F
- ☛ Can be bolted to floor or other flat surface with Connecting Rings
- ☛ Optional Leak-detection alarm
- ☛ Available in choice of colors
- ☛ Custom Company Logos available

Tank, Drum & IBC Secondary Containment Products

ProChem® ChemFeed™ Bin

ProChem® ChemFeed™ Bin is designed to safely contain your single-walled process tank and provide an integral mounting surface for Chemical Feed pumps or other equipment. The ProChem® ChemFeed™ Bin can accommodate tanks from 5 to 80-gallon sizes and up to four (4) metering pumps. Exceeds EPA 40 CFR secondary containment requirements for tanks up to 100 gallons. 100% LPE construction. Standard color is Black.

Description	Capacity	L x W x H	Part #
ChemFeed™ Bin	100	66" x 35.25" x 19.5"	02-30331

ProChem® Containment Basins

ProChem® Basins are made from LPE. Designed to provide secondary containment per EPA 40 CFR for Tanks up to 1500 gallon capacity. Optional fiberglass (FRP) grating base available to elevate tank from basin floor. Standard color is Black.

Steel Stands

Forkliftable Tank Stand

Peabody also offers stands for tanks that are provided with forklift slots for ease in moving your tanks from place to place. All coated steel construction and secure mounting brackets hold your tank secure for safe movement using best practices in forklift safety. Stainless Steel Stands are also available.

Note: Forklift stands for tanks up to 320 gallons.

Forkliftable Tank Stand	220 - 320 gallon	48" x 48"	4800 Lbs	02-33375

Warning: Move Tanks at Low Speed

Economy Steel Stands

Our economy steel stands are designed for commercial applications that are less demanding. Rated for materials up to 1.5 specific gravity, these flat bottom tank stands are not rated for engineered seismic restraint applications, but are a good choice for elevating your tanks for purposes like filling operations, mixing or simply elevating your tanks off the floor. Our Economy stands are available with or without agitator (mixer) mounting bracket.

Stands have 12" of bottom clearance. Black enamel coated steel construction.

Steel Stands

Steel Tank Dollies with Casters

Would you like to be able to move your Gemini Dual Containment® Tanks, Cylindrical or Square, or ProChem® Open Top Process Chemical Tanks around your facility? Then you need one of our Steel Dollies with Casters for easy mobility of your tanks. Our Dollies are rugged mild steel with construction with heavy duty steel casters rated to hold our tanks, even full of your heavy liquids. Just select the caster base designed for your tank size. For larger size tanks please call for pricing.

ProChem® PolyTank Stacker™

ProChem® PolyTank Stacker™

The ProChem® Tank Stacker™ is designed for tank installations where space is limited. Stack any combination of (2) of the following tanks: G10², G20², G15 or G20, as well as our ProChem® Open Top Process Chemical Tanks from 5 to 30-gallon sizes, or Pump Containment Enclosure, one over the other.

Description	L x W x H	Black
ProChem® Tank Stacker	30" x 30" x 46.25"	02-30348

Fill & Suction Lines

Fill Lines

Our Fill lines provide easy access for a tank to be filled by a tanker trucks. Tank fill lines include sidewall supports with clamps, a 45° elbow, ball valve and quick coupler with dust cap and lanyard. An optional ball check valve or dry disconnect coupling assembly can be added as options to minimize residue or liquid backflow when disconnecting your hose. The connection port is located 42" from the ground and angled off the sidewall for ease in connecting your tank truck hose for filling to the sidewall. This ergonomically positioned fitting is simple to connect a hose or pipe to without the need of a ladder, allowing for the quick connecting and disconnecting of a truck hose or systems with multiple fill connections.

Electronic Level Indication and Control Products

Level Detection

Whether you need simple point level indication or multi-level control, we can provide just sensors or a complete system with a controller to fit your specific application. A variety of sensor technologies and highly chemical resistant thermoplastic or 316 st. steel construction options, provides a viable solution for just about any environment. All standard models are 24VDC powered. 120VAC to 24VDC power converters available as an accessory.

Float Level Sensors

Our continuous float level sensor provides simple and accurate level measurement for our tanks up to 6' tall.

- Blind with junction box standard (signal out).
- Available in PVC/PPL/PVDF/316 SS.
- 4-20mA output will handle multiple functions; turning on/off pumps, open and close valves, provide visual or audible alarms, overflow protection, etc.
- Suitable for clean, non-sticky liquids.
- Local digital display with signal output or blind models available (signal out only).
- Pipe Size Connection 2"

Blind Units	Part #
PVC	24-34414

PVDF	24-34420
316 SS	24-34421

Local Display

Pressure Level Sensors, All-in-one Transmitter/Display Models

Submersible pressure level sensors have only one moving part, a small diaphragm, so they are very reliable and accurate. They are very versatile, unaffected by foam, vapor, turbulence, or condensate.

- Measures head pressure above sensor.
- Available in 316 SS/PVC/PVDF.
- Integral all plastic junction box.
- Pipe Size Connection 2"
- 4-20mA output.
- 24 VDC powered.
- Teflon cable.
- Kalrez seals.

Sensors w/Display	Part #
316SS	24-34380
PVC	24-34379
PVDF	24-34381

Pressure Level Sensors, with Junction Box

- Good for tanks over 6' tall where a 4-20mA signal output is desired.
- Digital colored display/controller available as an option, (see "Accessories" section for information on page 63).
- Includes an all plastic junction box.
- 4-20mA loop powered.
- 15 meter (49ft) Teflon coated cable standard.
- Pipe Size Connection 2"

Blind w/Junction Box	Part #
316 SS	24-34411
PVC	24-34412
PVDF	24-34413

**If you have a caustic solution, use the SS unit.*

Electronic Level Indication and Control Products

Ultrasonic Level Sensors

Ultrasonic sensors are non-contact and very accurate. Excellent choice for continuous level monitoring.

- Corrosion free PVDF construction.
 - Choose with Local LED indication model or Blind Model.
 - Viton seals.
 - Ideal for non-foaming, non-vaporous liquids.
- Quick wire disconnect 4-20mA loop powered.
 - 0.2% plus/minus accuracy.
 - Measuring tank sizes up to 19.6' field adjustable range.

Description	Part #
Series 500 Ultrasonic Blind Sensors	24-32364

- 1-1/2" MPT connection.
- Push button programming.
- 6M (19.6') range.

* Remote display sold separately.

Description	Part #
Series 1000 Ultrasonic Sensors with Local LED Display	24-34422

- 1-1/2" MPT connection.
- Push button programming.
- 6M (19.6') range.

**If your solution has foam, vapor, turbulence or condensate, our Radar or Pressure sensors are a better option.*

Radar Level Sensor

ProScan Radar level sensors are very reliable and very accurate non-contact sensors suitable for many applications that ultrasonic sensors do not perform well in, like applications with vapor and condensate. For extra demanding non-contact level indication, Radar is your premium option.

- 2" MPT connection.
 - 4-20mA loop powered.
 - 24 VDC.
 - 10M range
- Teflon wetted parts.
 - LCD Backlit display.
 - Industry's Only Thermoplastic Housing
 - Push button programming.

Description	Part #
ProScan Radar Level Sensor with Local LED Display	24-34423

* Remote display sold separately.

Electronic Level Indication and Control Products

Leak Detection

Capacitance Style Leak Detection Sensor with optional Audible/Visual Alarm Unit

*PN: 24-34378

If you need a simple, yet reliable leak detection sensor for your tank's secondary space, that will provide a 4-20 mA signal to send to your controller or computer, we recommend our capacitance style leak detection sensor. Capacitance/Proximity sensors will detect any liquids in the interstitial space and send out a signal to your controller. If you'd like to add a visual/audible unit, we recommend our PA 1000 alarm on page 63. This sensor will work with any of our double containment tanks.

*PN 24-34378 is for Sensor Only. Does not include the PA 1000 PN: 24-34425 see page 63.

You can order any of our double walled tanks with this leak detection product installed, as an option.

Features

- Easy to install. Drop into the interstitial space and secure it in place on any tank up to 60" in height.
- If you are installing it into an access opening, you can add a grommet to seal it in place.
- Provided with a special 1" PE Plug with grommet to seal sensor cable for a secure installation.
- 24VDC powered.
- Can also be used in sumps and other containment areas.

Battery Powered Leak Detection Sensor

PN: 24-34566

Leak Detection Sensor Battery Powered

- No power required, just install it into a 1" FPT pipe thread and it's operational.
- Long life battery won't need to be replaced for years.
- Includes visual LED Light, Audible Alarm and a silencer button.
- Cut to fit your tank in lengths up to 60". Adjustable cable length for any tank up to 60" in height.
- Very competitive price makes this product an easy addition to your double walled tank.

Electronic Level Indication and Control Products

Accessories

Universal Multi-Color LED Display/Controller

PN: 24-34424

Are you looking for a simple controller to compliment your level control system? Our Universal Multi-color LED display level controller will connect to any of our level sensors to provide the following benefits:

- Integral 120VAC to 24VDC converter.
- (4) 5Amp relay outputs.
- 4-20mA signal output + RS-485, Modbus RTU.
- NEMA 4X enclosure.
- Unique color display to mirror process conditions.

PA 1000 ProAlert Audible and Visual Alarm

PN: 24-34425

- Integral pulse to relay switch.
- Timer.
- 6' power cord.
- Red alarm light.
- 90 dB audible alarm with external test button.

Truflo Power Supply

PN: 24-34426

- 120 VAC to 24 VDC converter.
- With wall plug.
- All plastic construction.

LP100 Series Junction Box

PN: 24-34427

- All plastic NEMA 4X rated.
- 2" MPT connection.
- PP cable grips.
- Vaporbloc sealing system.
- Easy to install/wire, no tools required.

Level Monitoring, Control and Leak Detection

Float Gauge For Gemini® Tanks

All Gemini® Float Style Level Gauges have 2" Male Threads for easy installation into Gemini FPT top connections. Available in your choice of Stainless Steel or PVDF for more aggressive chemical applications. Float Gauges are great for monitoring liquid levels on Dual Wall Tanks since you can't see the level through the sidewall as you can in Single Walled Tanks.

Level Monitoring, Control and Leak Detection

Mini-Inverse Level Indicator with Calibration

Mini-Inverse Float Level Indication System is designed specifically for tanks, up to 1500 gallons. It can be ordered installed on your tank or as a kit that is very easy to install on existing tanks.

- The kit includes the complete assembly.
- Hot melt glue gun and glue sticks to attach the unit to the side of your tank is available as an optional accessory.
- It comes standard with an easy to read fiberglass calibration board in inches that can be easily sized to your tank height.
- For an added fee we will make you a tank gauge in gallons for your specific tank configuration.
- The wetted components are all plastic with a fluorocarbon cable and a polyethylene float, making it compatible with any fluid your tank is compatible with.
- Every kit will come with a simple laminated chart that tells how many gallons per inch based on tank dia. of Peabody Tanks.
- If your tank has a different dimension, we can provide custom calibration charts for a nominal additional charge.
- Eliminates the need for a bottom penetration in your tank as is necessary in traditional sight gauges.

Description	Part #
*Mini Inverse Level Gauge Kit - (Up to 60" Tanks)	02-32019
*Mini Inverse Level Gauge Kit - (Over 60" Tanks)	02-33336
Glue Gun Kit for Inverse Level Gauge	02-32020
*Mini Inverse Level Gauge Mounted On Tank Up To 1500 Gallons	02-32212
~Custom Calibrated Tank Gauge in Gallons	02-32213

*Laminated calibration chart comes standard for all Peabody tank sizes.

~Custom laminated calibration charts available per above.

Tank Accessories

ProChem® ClamShell Funnel

Transfer chemicals safely and efficiently from D.O.T. pails, Jeri cans and buckets or any other source into your Gemini® and ProChem® storage tanks, drums, IBC's, Tanks, or any other container with an 8" or smaller opening.

Item	Color	Fits Lid	Part #
ProChem® ClamShell Funnel for Drums	Black	2"	02-32819
ProChem® ClamShell Funnel for IBC's	Black	4" - 6"	02-31977
ProChem® ClamShell Funnel for Tanks	Black	8"	02-31951
ProChem® ClamShell Funnel Cover	Black	All	02-33045
Lanyard To Secure Lid To Funnel			02-31777

*other colors and materials of construction available on request

- Constructed from durable light weight linear polyethylene.
- Designed to snugly fit 30 and 55 gallon Drums, Intermediate Bulk Containers (IBC's) or any Peabody Tanks with 5" or 8" Twist Lids, including Gemini® Cylindricals, Gemini® Squares, ProChem® Single Wall Tanks, ProChem® Closed Top Tanks, and others.
- Highly chemical resistant works great on any tank with 8" or smaller lids.
- Standard color is black to hide dirt and stains.
- Scalloped clamshell design with integral molded-in ridges to direct flow toward the tank opening and help reduce splashing.
- Molded-in top internal rim flange "splash-guard" to further reduce potential for splashing.
- Integral molded-in nozzle easily fits into 2", 4" and 8" sizes to fit drums, IBC's and tanks respectively.
- Integral molded-in support lugs hold the funnel securely in place once installed and allows for easy removal when finished.
- Smooth inner surface allows for efficient flow of product from pail or bucket into tank and easy clean-up after filling.
- Optional cover available to contain residue and odors. Optional lanyard also available to attach lid to funnel.
- Low cost, so all of your operators and sales force can always have one or more on hand.
- Great for liquid waste collection.

Tank Accessories

FiberRing Restraint Systems, Seismic and Non-Code For Gemini Dual Containment® Tanks

Seismic FiberRings are designed to secure Gemini Tanks and ProChem® Tanks to a concrete foundation for seismic restraint or to secure in other applications, like boats, where the tanks need to be stabilized from movement. Each FiberRing includes a pre-drilled base flange to allow bolting to a foundation or deck (bolts not included). Seismic Engineering calculations available at additional cost.

FiberRings ordered with tanks can be supplied with a hole for bottom discharge fittings. Call for more information.

Tank Accessories

Mixer Mounting Systems

If you need to mount a mixer on your tank, we can help you. We have been designing and manufacturing mixer mounting systems for over 3 decades. We have manufactured systems for tanks from 15 gallons to over 10,000 gallons.

We have (3) standard configurations to fit any tank size, flat bottom, cone bottom, single or dual wall.

Whether you need a simple clamp-on style system or an engineered bridge design, we can help you with your specific application. Choose light, medium, or heavy-duty style, depending on your application.

We also offer seismically compliant systems and engineering calcs if required. Our std. units are non-metallic, all fiberglass construction, but we also offer mild steel, aluminum, and stainless steel systems.

Contact our customer service department and we will help you choose the right model for your tank.

Medium Duty FRP Mixer Mount

Description	Part #
Medium Duty FRP Mixer Mount For Up To 55 Gal	204-31726
Medium Duty FRP Mixer Mount For 56 - 200 Gal	204-31727
Medium Duty FRP Mixer Mount For 201 - 1500 Gal	204-31728

Models available for clamp on or flange mount mixers.

Heavy Duty FRP Mixer Mount

Description	Part #
Heavy Duty FRP Mixer Mount For Up To 500 Gal	204-31729
Heavy Duty FRP Mixer Mount For 501 - 2500 Gal	204-31730
Heavy Duty FRP Mixer Mount For Over 2500 Gal	204-33897

For flange mounted mixers.

Tank Accessories

ProChem® Flexible Heating Blanket Systems for Gemini® and ProChem® Tanks

Some chemicals, like caustics, are very sensitive to temperatures below 60 degrees F. Storage and process tanks that are located in cold environments like unheated warehouses and outdoor installations may need “freeze protection” systems as well. If your tank needs to be heated, consider the New ProChem® Flexible Heating Blanket Systems.

ProChem® Flexible Heating Blanket Systems provide a very simple and cost effective method to add a heating system to any of our tanks.

Features:

- Easy to install. Just wrap around the tank, and attach with integral “quick-release” buckles and straps. That’s it!
- Easily removed for storage or to install on another tank
- Folds flat when not in use
- Adds less than an inch to tank diameter when installed
- Simple thermostatic control preset for a specific temperature range
- Adjustable thermostat available as an option
- Operates from std. 110v power wall socket with 15’ power cord
- Designed for indoor use, with optional “weather proofing jacket” for outdoor usage areas
- Higher power units available for more demanding applications
- Larger Heating Blankets for Larger Tanks are available – contact us for more information
- We can preinstall the system on your new tanks or ship them to you for your operators to install. Since we have specific models for all of our tank sizes, they are “easy” to install on existing tanks in the field
- We have (9) different standard models, to fit all of our tanks:
 - Gemini® Round Tanks
 - Gemini® Square Tanks
 - ProChem® Process Tanks
 - ProChem® Open Top Tanks
 - ProChem® Closed Top Tanks

Jacket A - Standard		PN 02-32277
Factory Freight Adder (NET add-on to final price)		
Adjustable Size: 37.5"-57", 10.5" height		
Power: 200W, 110V Single Circuit		
For use with the following Tanks		Tank Size
Open Top		5 Gallon
Closed Top		5 Gallon
Open Top		10 Gallon
Closed Top		10 Gallon
Open Top Nestable		10 Gallon
Open Top		15 Gallon
Closed Top		15 Gallon
Open Top		30 Gallon
Closed Top		30 Gallon
Gemini² Dual Containment®		5 Gallon
Gemini² Dual Containment®		10 Gallon

ETL Approved, Meets UL and CSA standards. Ordinary and Hazardous Location products available.

---	--------------------

Factory Freight Adder (NET add-on to final price)

Adjustable Size: 165"-193", 37.5" height

Power: 2700W, 110V Dual Circuit

For use with the following Tanks	Tank Size
Gemini Dual Containment®	500 Gallon

Optional
Thermostatic
Controller

Additional Options

Weather Jacket

Cost adder for Weather Jacket for outdoor usage.

Weather Covers	Part #
Jacket A	02-32286
Jacket B	02-32287
Jacket C	02-32288
Jacket D	02-32289
Jacket E	02-32290
Jacket F	02-32291

Controllers

These are options for more accurate temperature control. High power units have "Dual Circuits" and therefore could require (2) controllers if you choose to add them.

Control Adders	Part #
Single Control	02-32357
Dual Controls	02-32358

Heating and insulation systems are available on all of our larger tanks too. Ask for assistance.

Tank Accessories

Tank Ventilation

Atmospheric storage tanks are required to be adequately vented to prevent vacuum or pressure conditions that could exceed the design requirements caused by the filling or draining of the tank or a difference in atmospheric conditions inside and outside the tank. Our Mushroom Vents, U-Vents and Custom Peabody Tank vents provide the desired ventilation while preventing outside contaminants from entering the tank. For certain chemicals, additional precautions may be required in the ventilation installation. Call customer service with any questions involving ventilation.

Tank Installation Fitting Not included. Tank Fittings starting on page 80. Price does not include installation. Contact Customer Service for additional details.

Fiberglass Structural Reinforcing on Poly Tanks

Fiberglass structural reinforcing on molded plastic tanks offers many benefits. We have a full inhouse fiberglass manufacturing facility, which allows us to offer all of these benefits to you.

In this section: Standard Fiberglass Reinforcing Wraps

-  Additional hoop strength for high temperature and very heavy chemical applications
-  Added impact resistance
-  UV blocking
-  Custom colors and textures

Improving Hoop Strength:

High Heat

Polyethylene is typically rated for temperatures up to 140 F, however we recommend you consider the benefits of adding a fiberglass reinforcing wrap for temps above 125 F.

Polypropylene and PVDF can handle higher temperatures than polyethylene but also receive significant benefits from adding a fiberglass reinforcing wrap due to lower impact resistance and the potential of sidewall ruptures from impact or water hammer.

Heavy Solutions

Liquids with high specific gravities, like concentrated acids and caustics, or solutions with a high percentage of "solids", like brine tanks, can be very heavy, often approaching or exceeding twice the weight of water.

-  Plastic tanks are more "flexible" than fiberglass and metal tanks, therefore these heavier liquids, can cause more sidewall deflection than tanks made from other materials.
-  Extra sidewall deflection, (bulging), is typically acceptable with plastic tanks but it can make connecting to lower sidewall process connections more difficult, so many operators prefer not having to compensate for this.
-  Adding a fiberglass reinforcing wrap to the tank sidewalls will eliminate this concern.
-  It can also help support sidewall accessories like fill lines, valves, filters and even pumps.
-  Reinforcing wraps are on the full sidewall of the tank (tank dome and bottom excluded).

Impact Resistance

Rotationally molded polypropylene and PVDF do not have as good of impact resistance as polyethylene does. Adding a fiberglass reinforcing wrap will add significant impact resistance. We can include a sheet of structural foam padding and make them even more impact resistant!

UV Barrier

Adding a fiberglass reinforcing wrap to the tank sidewalls and top provides a 100% UV barrier. This will extend the tank life and is an excellent benefit for tanks storing chemicals that are affected by UV light, like sodium hypochlorite! We can add opaque white color to the resin, which will also help reflect infrared light and help keep the tank cooler. This will also help other chemicals that are sensitive to high ambient heat.

Custom Colors and Textures

We can coat your poly tank with fiberglass and provide any custom color or texture you want, to match custom company or project colors and textures. This is very popular for specific projects. For example, we have coated tanks with "rust colored" fiberglass for tanks storing ferric chloride, to help hide "rust colored" stains caused from vent vapor residue.

We have also added fiberglass reinforcing wraps with unique textures to match surrounding themes, like amusement parks, city parks, existing buildings, etc. See page 101 in our catalog for more info.

These are std. reinforcing wraps. If you have an application that requires a thicker reinforcing wrap, we will help you choose the correct thickness and quote it as required.

Here are some of the other benefits we offer to enhance your tanks using fiberglass:

-  Adding seismic and wind restraint systems: see page 90.
-  Adding insulation and heat tracing: see page 92.
-  Installing fiberglass ladders, stairs, and platforms: see page 100.
-  Installing mixer mounting systems: see page 70.
-  Adding custom encapsulated signage: see page 37.

Peabody offers several options for lids on your ProChem® Open Top Process Chemical Tanks. We can add a heavy duty bolted lid made of polyethylene sheet, with or without your choice of stainless steel or plastic hinges. If you prefer a more economical solution, we can add a stainless steel hinge to your standard "shoebox" lid provided with every ProChem Tank on page 10. Bolted lids include stainless Steel hardware and a PVC Foam gasket seal. Hinged lids can be any configuration you desire. An optional plastic handle is also available. Call customer service for more information on customization options.

Hardware is available in plastic and st. steel. Ask us about "custom lids".
Shoebox Lid is provided with Tank - Shoebox Hinge is adder for Hinge only.

All lid styles available on a variety of tanks.

Bulkhead Fittings/Tank Adapters

Bulkhead fittings come in two styles: (1) single nut compression style and (2) bolted style and are made in a wide variety of materials. Our customer service department will help you select the right material for your application.

Bulkhead Materials

PVC

Polyvinyl Chloride (PVC) bulkhead fittings can be used in a wide variety of applications. It has excellent chemical resistance to most solutions of acids, alkalis, salts, and other organic compounds miscible with water. PVC is not resistant to aromatic and chlorinated hydrocarbons. (32°F to 140°F)

CPVC

Chlorinated Polyvinyl Chloride (CPVC) can be used in the same applications as PVC but can withstand higher temperatures. (32°F to 195°F)

PPL

Polypropylene (PPL) is the lightest of the plastic bulkhead material and can be used in a wider variety of applications than PVC. (-4°F to 195°F)

316 SST

316 Stainless Steel is the strongest of all bulkhead fitting types. 316 SST has a very wide range of chemical resistance and can handle temperatures way beyond that of plastic fittings.

If you are unsure of which fitting material or gasket is best for your application or have other questions, please contact customer service.

For drop ship orders, not all fittings are available installed in tanks.

Small PVC Bulkhead Fittings

PVC Bulkhead fittings are available in smaller sizes for required applications, SxT only.

Specialty and Small Bulkhead Fittings	Bulkhead Fittings	
	1/4" PVC Bulkhead	3/8" PVC Bulkhead
Gasket	Part #	Part #
EPDM	02-29268	02-29270
Viton	02-29269	02-29271

PVDF, PPL and Teflon available call for more information.

Gasket Materials

EPDM

Ethylene Propylene DieneTerpolymer (EPDM) gaskets are designed especially for acids and can handle many aggressive chemicals, alcohols and environments over time. (-4°F to 195°F) Also called EPT or EPR.

Viton

Viton, or FKM Fluorocarbon Rubbers, are the most chemically resistant, balanced, and have excellent overall properties. Viton is not suitable for caustic chemicals. (-20°F to 302°F)

X-Link

Cross-Link Polyethylene Foam gaskets have a wide range of chemical resistance that match our tank. X-Link has no form memory so removing this fitting after it has been compressed can cause leaks when re-installed later. (32°F to 140°F) Also called XLPE.

Tealon

Tealon is resistant to most chemicals, insoluble, inert, non-flammable, dielectric, naturally lubricated and thermally stable. (-40°F to 302°F)

Bulkhead Installation Charge Per Fitting

Description	Installation Part #
*Bulkheads 1/4" – 2"	272-27297
*Bulkheads 3" – 6"	272-27298
*Bolted Bulkheads	272-34428

*Installation Charges are NET.

Bulkhead Fittings/Tank Adapters

Bulkhead Fittings Standard Flange - PVC | CPVC | PPL

PVC Bulkhead Fittings

High quality PVC Fittings come in SxT. Available with EPDM or Viton gasket.

CPVC Bulkhead Fittings

High quality CPVC Fittings come in SxT. Made of Corzan® CPVC and available with EPDM or Viton Gasket.

PPL Bulkhead Fittings

High quality PPL Fittings are only available in TxT. Available with EPDM or Viton gaskets.

If you are looking for SS bolted style tank adaptors, this is an excellent choice. Due to state of the art automated manufacturing methods, these high quality fittings are our best priced options. Versatile EPDM gaskets are standard with all Economy SST Bolted Fittings. Viton and cross linked polyethylene gaskets are also available and must be ordered separately.

Welded Process Fittings

Welded Couplings

Made from 100% virgin, UV-resistant black polyethylene, our threaded couplings are the best choice for your demanding applications. Since they are welded into your tank, no gaskets are necessary, making them virtually maintenance free. Available in Full (thd x thd) and Half (single thd) coupling configurations. PPL and PVDF available call for pricing. Items below include installation in Single Wall Tanks. Double Wall installation price on request. For uninstalled fittings, please call for pricing.

Welded Flanges

Welded Polyethylene Flanges are designed for demanding applications where a bolted connection is necessary. Great for use with butterfly valves, expansion joints and any application where a permanent gasketless tank wall connection is desired. PVC Flange Rings are Van-Stone style so ring can be rotated to line up with companion flange. Flanges 2" and above include plate gussets for maximum strength. Price includes installation. PPL and PVDF available call for pricing. Larger sizes available - call for pricing.

Description	# of Gussets	Install SW PN	Install DW	Fitting Only

DW = Double Wall

Bulkhead Installation Charge Per Fitting	
Description	Installation Part #
*Bulkheads 1/4" – 2"	272-27297
*Bulkheads 3" – 6"	272-27298
*Bolted Bulkheads	272-34428

*Installation Charges are NET.

Spinweld Fittings

These economical fittings are an excellent choice for top fittings or low-demand bottom discharge fittings. Installation included in price. All of the spinweld fittings below are single thread. Double Thread fittings are available in some sizes. Call or email for more information.

Installed in Tank	Part #
1/4" Spin Weld NPT, PE	02-28812
1/2" Spin Weld NPT, PE	02-29398
3/4" Spin Weld NPT, PE	02-29501
1" Spin Weld NPT, PE	02-28777
1-1/2" Spin Weld NPT, PE	02-29502
2" Spin Weld NPT, PE	02-29628
3" Spin Weld NPT, PE	02-31024

Spin weld fittings are not recommended as sidewall or bottom connections for demanding applications on tanks larger than 100 gallons. Call or email customer service for application assistance.

Polypropylene Spinweld fittings are also available for Polypropylene tanks.

Ball Valves

Full Port Ball Valves

Peabody offers a variety valves to choose from. Our customer service department will help you pick the best ones for your applications.

Glass Reinforced Polypropylene Bolted Ball Valves

Manufactured from glass reinforced polypropylene for strength and durability-will never rust or corrode. Self-aligning ball rotates freely against Teflon® seats. Unique body-to-flange design allows for low torque on/off operation. Viton O-ring stem seal and EPDM O-ring body seal. Pressure rating: 1/2" to 3" 125 PSI @ 70°F; 4" 90 PSI@70°F.

Description	Part #
1/2" Bolted Ball Valve - Full Port - TxT - PPL	10-2993

Bolted Manways for Engineered Tanks

Most of our standard Engineered Tanks have a standard 16" or 22" vented Twist-Lid style manway. If your application calls for a Bolted Manway, we offer them in a variety of sizes. Bolted manways are fabricated of 100% Linear Polyethylene and welded into the tank's top in the location you specify. Standard Bolted Manways include a 1/2" coverplate, PVC Gasket and 18-8 stainless steel fasteners. Other gasket and fastener materials available. Hinges are also an available option. Call Customer Service for more information.

48" HDPE Welded & Bolted Manway Assembly Installed in Tank	272-28688
60" HDPE Welded & Bolted ManwayAssembly Installed in Tank	272-28689

Seismic and Wind Tank Restraint Systems

Peabody offers four styles of tank restraint systems for seismic, wind, snow loading and for securing tanks on moving vehicles and marine applications. Each of the four systems will secure your tank per the International Building Code (IBC) and each has its own strengths for specific applications. We offer non-certified systems as well as certified systems complete with wet-stamped engineering calculations and CAD Drawings (Engineering packages at additional cost). Our restraint systems do not include anchor bolts, as they are readily available and less costly if you purchase them separately. We can provide them as a convenience if you prefer, at additional cost. Below pricing is for vertical Flat Bottom Tanks. Horizontal and Cone Bottom Tank Restraint systems are quoted upon request.

Engineering and Wet Stamped Calculations

If you need wet stamped Engineering calculations per IBC regulations for your tank project, we can provide those for you for all 50 states as an additional service. Our basic engineering is for the tank restraint system, but we can also offer engineering for the anchor bolts and the concrete housekeeping pad. Each of the 3 sets of calculations are normally required for permitting and are offered individually, so we can provide you with one, two or all three site specific calculations. For more information on Engineering services, contact your Authorized Peabody Distributor.

Calculation Set	Part #
Tank Shell/Anchor Lugs	272-28247
Anchor Bolts	272-30950
Concrete/Housekeeping Pad	272-30951

FiberPlast FiberRing

This restraint system offers a fiberglass shell that your tank “slips into” that you can bolt to a concrete pad or a deck on a Ship or vehicle. The FiberRing is molded from composite fiberglass in a one-piece unit and can easily be field installed or provided with your new tank prior to shipping. Available in Code and Non-Code versions. See page 68 for standard FiberRings for ProChem & Gemini Tanks.

Description	Non-Code Part #	Code Part #
25 - 550 Gallon Single Wall Flat Bottom Tank	272-34429	272-34432

8401 - 15000 Gallon Single-Wall Flat Bottom Tank	272-34442	272-34444

Additional Anchors available for demanding applications at additional cost.

Double-Wall Tank Cable Restraint systems also available – Call for more information.

ProChem® Cable Restraint Systems

Our Cable restraint systems can be designed and fabricated for any of our tanks or tanks you have purchased elsewhere. They are provided in kit form and include cables and anchor lugs to secure your tank in place. These systems, which are our most economical choice, are also available in code and non-code styles, with or without engineering calculations. Pricing varies based upon tank size and number of anchors. Call for assistance in properly specifying your ProChem Cable Restraint System.

Tank Capacity (Gal)	Part #	Additional Lugs Part #
Up to 850	272-28793	272-34658
850 - 3000	272-28794	272-34659
3000 - 15000	272-28795	272-34660

Seismic and Wind Tank Restraint Systems

PolyPlast Restraint System

The PolyPlast Restraint system is designed for flat-bottomed tanks up to 3000 gallons in size. We fabricate Steel anchor lugs, which are permanently attached to the bottom sidewall of the tank secured in place by a welded polyethylene strap. The number of lugs depends upon your specific requirements and service conditions. Available in Code and Non-Code versions, this system is cost-effective and simple to secure to your pad since the lugs are in place the moment you set your tank. Simply bolt in place using epoxy or wedge style anchor bolts. This system is superior to the ProChem Cable Restraint system because it minimizes stress points on the tank during a seismic event by distributing the load more evenly around the tank circumference. Anchor lugs are also available in stainless and other alloys for highly corrosive environments. PolyPlast may be a viable choice for tanks larger than 3000 gallons in certain applications. Call for more information.

PolyPlast Restraint System	Non-Code Part #	Code Part #
25 - 550 Gallon Tank	272-28587	272-34445
551 - 1550 Gallon Tank	272-28588	272-34446
1551 - 2500 Gallon Tank	272-28589	272-34447
2501 - 4000 Gallon Tank	272-28590	272-34448
4001 - 6000 Gallon Tank	272-28591	272-34449
6001 - 8400 Gallon Tank	272-28592	272-34450
8401 - 15000 Gallon Tank	272-28593	272-34451

Additional Anchors available for demanding applications at additional cost.

FiberPlast Restraint System

The FiberPlast Restraint System is our best system in terms of minimizing stress points on your tank in a seismic event. The bottom third to half of the tank is wrapped in a fiberglass (FRP) composite shell with bolt in place steel anchor lugs laminated into the base of the tank sidewall. This system all but eliminates concentrated loads on the tank shell by evenly distributing it around the entire tank circumference. The number of lugs depends upon the application requirements, installation location and importance factor required. This system is permanently attached to the tank and significantly increases the strength and durability of your tank. Code and Non-Code versions available. It can also be combined with a full FRP wrap for high heat, UV blocking or heavy solutions. Lugs are also available in stainless steel and other alloys for corrosive applications.

FiberPlast Restraint System	Non-Code Part #	Code Part #
25 - 550 Gallon Tank	272-28607	272-34452
551 - 1550 Gallon Tank	272-28608	272-34453
1551 - 2500 Gallon Tank	272-28609	272-34454
2501 - 4000 Gallon Tank	272-28610	272-34455
4001 - 6000 Gallon Tank	272-28611	272-34456
6001 - 8400 Gallon Tank	272-28612	272-34457
8401 - 15000 Gallon Tank	272-28613	272-34458

Additional Anchors available for demanding applications at additional cost.

Heat Trace & Insulation

Armor Seal Insulation & Heating Options

Our tank Insulation Systems are installed on the exterior wall of your tank. The standard insulation package has 2" high density urethane foam and a hard fiberglass topcoat with a chemical resistant gel coating. Our rigid Armor Seal top coating is more durable than the standard mastic coating found on other insulation packages that are soft and easily damaged during transit and installation, exposing the foam to environmental damage and accelerated heat loss. Our insulation values are higher, requiring less energy to maintain tank temperature, which translates to energy savings and a greener environment.

*Reduced pricing available on Insulation systems when combined with a FiberPlast Seismic restraint system.

Insulation & Gel Coat Only		
Description	Size	Part #
2" Foam Insulation w/Gel Coat	up to 2100 Gal.	204-28082
2" Foam Insulation w/Gel Coat	2500 - 3000 Gal.	204-28083
2" Foam Insulation w/Gel Coat	3001 - 6500 Gal.	204-28084
2" Foam Insulation w/Gel Coat	6501 - 8400 Gal.	204-28085
2" Foam Insulation w/Gel Coat	8401 - 10000 Gal.	204-28420
2" Foam Insulation w/Gel Coat	10001 - 15000	204-28421

*Min. Charge is \$500 *Heating systems priced separately. Insulated Tanks should be wrapped or crated for shipping to prevent damage.

Tank Heating System

Tank Heating Systems are installed on the exterior wall of your tank, under insulation (priced separately). The standard heating package is sized for a service condition of maintaining the tank contents at 73°F with a minimum external temperature of 0°F and a 30 mph wind. Thermostatic controller is priced separately below.

To price a heated tank, add your insulation, heating system and controller for the tank size and voltage required. Heating systems must be factory installed on tanks. Insulation is required for all heating systems.

Tank Heating System		
Description	Size	Part #
Tank Heating Panels less Insulation- 400 Watts per panel	up to 1000 Gal.	204-28086
Tank Heating Panels less Insulation- 400 Watts per panel	1001 - 3000 Gal.	204-28087
Tank Heating Panels less Insulation- 400 Watts per panel	3001 - 7800 Gal.	204-28091
Tank Heating Panels less Insulation- 400 Watts per panel	7801 - 12000 Gal.	204-28418
Tank Heating Panels less Insulation- 400 Watts per panel	12001 - 15000 Gal.	204-28419
120V Adjustable Thermostatic Temperature Controller		204-28088
240V Adjustable Thermostatic Temperature Controller		204-28089
Controller Mountin Kit for Tank Mounting		204-28090

Special Application Tanks

Special Application Tanks

Peabody has been in the plastic tank business for over 4 decades, so we have seen a very wide variety of applications for plastic storage tanks. Some tank storage applications have unique requirements that are important to understand. We can provide engineered plastic storage and process tank solutions from 5 gallons to 20,000 gallons. Below are some parameters to be aware of when you are specifying your tank. As always, our experienced customer service team is available to help you make the best decisions on your tank design.

Temperature, Pressure, Vacuum and Venting

Temperature

Polyethylene tanks work well up to about 120 degrees F. Once the temperature exceeds the 120 F ceiling, the physical properties of the tank, specifically wall stiffness, weaken and excessive wall deflection (bulging) can become an issue.

By adding a fiberglass overwrap to the tank, the temperature resistance can be increased up to 160 degrees F depending on the chemical being stored and other factors in specific applications.

Pressure and vacuum

Polyethylene tanks are primarily designed for non-pressure and non-vacuum applications. They are intended for normal head pressure relative to tank heights. In some situations, poly tanks can handle small amount of additional head pressure from overhead piping and nitrogen blanket systems, but this needs to be reviewed and approved during the design phase of each installation.

Venting

Since poly tanks are not designed to hold pressure or vacuum, they are provided with lids to vent both pressure and vacuum. The pressure and vacuum inside the tank should be the same as it is outside the tank.

Rule of thumb for venting a polyethylene tank is to provide a vent one pipe size larger than the largest process fitting, whether that is a suction or discharge fitting. You can consider the vented lids in this calculation and assume the std. 16" lids vent equal to about a 3" pipe size.

Don't hesitate to add extra venting. It's not a very expensive option and it's better to have extra venting, than not enough!

Pneumatic filling

Filling poly tanks with a pneumatic system from trucks or rail cars is fairly common. If you anticipate this type of filling procedure will be employed on your tank, we recommend you let your tank supplier know, so they can help you make accommodations for that during the tank design phase of your project.

Product Specific Applications Related to Chemical Resistance

There are two families of polyethylene resins used to manufacture rotationally molded tanks, linear polyethylene, and cross-linked polyethylene. There are a variety of differences you need to consider when choosing which type you prefer for your application, but we are going to specifically address chemical resistance.

Linear Polyethylene has a wider range of chemical resistance than Cross linked polyethylene does, but each has their specific strengths., Linear Polyethylene is recommended for the following chemicals:

- Concentrated sulfuric acid
- Hydrogen peroxide
- Sodium hypochlorite, (also called bleach)
- Chlorine dioxide

*If you have other products that are oxidizers and want to check on compatibility, please contact our customer service department. They will be glad to assist you.

Special Application Tanks

We do not recommend using cross linked tanks with linear liners. Premium linear polyethylene tanks have equal or better physical properties than cross-linked polyethylene tanks, so there is no benefit to using cross linked tanks with linear liners and they create extra potential problems with fitting connections. Linear liners do not bond with crosslinked tanks, creating additional risks of tank integrity. Don't be fooled, just specify a linear polyethylene tank.

Product specific considerations

The information below is only a general guide. These are very aggressive chemicals, so please check chemical resistance guides from the manufacturer you plan to buy your components from.

We are not recommending any specific products, only sharing information for you to consider when you configure your tanks for these applications based upon materials typically specified by our customers.

All information listed below is based on ambient temperatures and atmospheric pressure and vacuum.

Concentrated Sulfuric Acid (H₂SO₄) (up to 98%)

- Linear Polyethylene tanks are a great choice for dilute sulfuric acid solutions (90% and below) as well, but those applications may require different fittings and accessories
- 1.9 SPG tanks recommended
- Welded polyethylene fittings work well. We can provide couplings or flanges, but flanges are stronger and a better choice
- PVC valves and fittings are compatible for concentrations up to about 70% with ambient temperatures
- For concentrations above 70%, you should consider using CPVC, PVDF or type 316 st. steel components
- Viton and Teflon gaskets are typically utilized with the higher concentrations
- Normal venting, specified by project manager
- Double containment recommended
- Ambient Temperatures only; Not recommended for elevated temperature applications above 100 degrees F

Sodium Hypochlorite (NaOCl) (12-1/2%)

- 1.5 SPG tank, but some prefer 1.9 SPG as an added corrosion barrier
- All non-metallic components recommended
- Welded process fittings work well, as do bulkhead fittings in the correct chemically compatible materials
- Both EPDM and Viton elastomers are used in NaOCl applications
- Normal venting, specified by project manager
- Double containment recommended

Special Application Tanks

Hydrochloric Acid/Muriatic Acid (HCl)

- Up to 37% concentrations
- 1.5 SPG tank recommended
- All non-metallic components recommended
- Welded process fittings work well, as do bulkhead fittings in the correct chemically compatible materials
- Both EPDM and Viton elastomers are used in HCl applications
- This product has noxious fumes and is typically vented away from operators and equipment, often to a scrubbing system
- Double containment recommended

Hydrogen Peroxide, (H₂O₂)

- Up to 50% concentration
- 1.9 SPG recommended
- Welded polyethylene fittings work well. We can provide couplings or flanges, but flanges are stronger and a better choice.
- Passivated type 316 st. steel fittings and piping are frequently used
- Special venting might be recommended
- Double containment recommended

Sodium Hydroxide (NaOH) and Potassium Hydroxide (KOH)

- 1.9 SPG recommended
- Welded polyethylene fittings work well. We can provide couplings or flanges, but flanges are stronger and a better choice.
- PVC, CPVC, and type 316 st. steel bulkhead fittings are also used in these applications. PVDF is not recommended.
- Sensitive to temperatures below 65 F, so insulation and heat tracing might be required at or above 50% concentration
- EPDM elastomers are compatible, Viton is not recommended.
- Double containment recommended.

Special Application Tanks

Chlorine Dioxide (ClO₂)

- 1.9 SPG tank recommended
- We have customers that use high density linear polyethylene tanks for this application, but others that prefer PVDF tanks, which are available from Peabody on request in many sizes, both single and double walled models.
- All non-metallic wetted components recommended
- Welded process fittings work well, as do bulkhead fittings in the correct chemically compatible materials.
- Viton and Teflon gaskets are most commonly used in this application
- Teflon and PVDF piping and fittings are most commonly used
- This product has noxious fumes and is typically vented away from operators and equipment, often to a scrubbing system
- Double containment recommended. Sizes from 5 gallons to 1300 gallons.

Other chemicals

- Peabody Engineering publishes a chemical resistance chart you can use as a guide for selecting the proper tank for your applications.
- Please feel free to send us an email or call us for recommendations on specific applications.
- Blended chemicals and proprietary chemicals are difficult to determine regarding compatibility with polyethylene tanks. We have learned that the chemical suppliers often know if polyethylene tanks are compatible with their chemicals and chemical blends, so we recommend asking them about chemical compatibility with polyethylene tanks.

Other resins

Peabody manufactures tanks in the following resins:

- Linear low density polyethylene (LDPE)
- Medium density linear polyethylene (MDPE)
- High density linear polyethylene (HDPE)
- High density cross linked polyethylene (XLPE)
- Polypropylene (PPL)
- Polyvinylidene Fluoride (PVDF), also known as Kynar®

*If your chemical is not compatible with our standard linear resin, check with our customer service representative to see if one of the other resins above will be compatible.

Accessories

Once you choose the right resin, let our customer service team help you choose the best accessories. We can help you put together a complete tank system with everything from simple process connections to certified seismic restraint systems and everything in between.

* Kynar® is a registered trademark of Arkema

FRP Grating

Molded and Pultruded Fiberglass Grating

Fiberglass grating is great for decking in wet and corrosive environments. With excellent strength and weatherability, it offers flexibility in facilities for a non-skid, chemical resistant flooring alternative with structural qualities to support piping, personnel, pumps and other equipment in your operation. Available in a variety of sizes and thicknesses for different applications in both standard polyester and vinylester for harsher chemical environments. Our grating is also rated for flame retardant applications per ASTM E-84 standards. Available in Molded and Pultruded configurations offering you flexibility in your design.

Our molded grating is available in 3 sizes; 1" with 1-1/2"x1-1/2" square grids, 1-1/2" with 1-1/2"x1-1/2" square grids and 2" with 2"x2" square grids. Choose from our General Purpose Polyester or our superior Corrosion Resistant Vinylester. Standard color is Dark Gray with non-skid meniscus surface. Other colors available.

Molded Grating

Thickness	Sheet Size	Grid Size	Polyester PN	Vinylester PN	Weight Per Panel
1"	3' x 10'	1-1/2" x 1-1/2"	16-4852	16-4910	75
1"	4' x 8'	1-1/2" x 1-1/2"	16-4835	16-4887	80
1"	4' x 12'	1-1/2" x 1-1/2"	16-4836	16-4888	120
1-1/2"	3' x 10'	1-1/2" x 1-1/2"	16-4854	16-4912	120
1-1/2"	4' x 8'	1-1/2" x 1-1/2"	16-4839	16-4889	128
1-1/2"	4' x 12'	1-1/2" x 1-1/2"	16-4840	16-4890	191
2"	4' x 12'	2" x 2"	16-4843	16-4891	207

FRP Grating

Molded and Pultruded Fiberglass Grating

Our Pultruded Grating provides the capability to support heavier loads and longer spans than molded grating of similar weight and depth. Great for applications from ADA compliant walkways to heavy vehicular traffic conditions. Skid resistant pultruded grating is available in premium grade Isophthalic and Vinylester resins.

Pultruded Grating

FRP Fabrication

FRP Tank and Access Ladders | Stairs | Platforms | Handrail Systems

Products manufactured from fiberglass are lightweight, chemical resistant, non-conductive and very durable. We manufacture a very wide range of fiberglass products, from simple access ladders to engineered platforms and architectural structures for tank and pump containment. Let us help you with fiberglass products for anywhere in your facility.

Products

- Ladders
- Stairs
- Handrail systems
- Access Platforms
- Cross Overs
- Raw materials: angle, channel, I beam, tube, sheet, grating
- Custom parts

**we can manufacture these items in polyester or vinylester, and in a variety of colors and textures to fit your specific requirements.*

Ladders

Std. ladder specifications:

- Polyester construction - standard in safety yellow. Custom colors available
- 1-1/4" fluted rungs
- 2" square tube rails
- Std. 42" walkthrough
- (2) Sets Standoff clips, plus every 6' as required
- (1) set standoff clips, plus every six feet as required
- Ladders priced per full foot or fraction thereof. 42" walk-thru standard unless otherwise specified
- Ladders 24' and taller require fall protection
- 22" wide x 24" deep top grate landing with handrails available in place of top rung
- Safety chain or self-closing gate available for entry to landing

**Ladders also available in vinylester for extra corrosion resistance and Special FDA resin for service in potable water applications*

**Ladders also available in Aluminum Construction, call for pricing.*

FRP Fabrication

Stairs, Handrail Systems, Access Platforms and Cross Overs

Our customer service department will help you specify and order any of these items, including certified engineered designs if required.

Raw materials: angle, channel, I beam, tube, sheet, rod, and grating. Threaded FRP rod and nuts also available. We stock all these in a variety of sizes. These items are available in standard lengths, plus we can cut standard lengths into smaller lengths to your specifications, for a reasonable service charge. All shapes are available in polyester and vinylester. Custom colors available.

Custom Parts

Fiberglass is an extremely versatile material. With our experienced staff of CAD designers, engineers, and experienced fabricators, we can help you with almost any project, including screening your tank to match the installation environment.

Shipping and Packaging of Your Tank

Palletize and Stretch Wrap

We go to great lengths to inspect, clean and package your tanks and equipment so that you receive them in pristine condition. We visually inspect, vacuum inside and wash every tank inside and out prior to shipping to ensure you get a tank that we are proud of. Our smaller products are either boxed individually or strapped on pallets, then wrapped in polyethylene stretch wrap and protective fiberboard to protect them from potential damage in transit. We offer additional protective packaging if you desire to further protect your precious cargo to minimize the risk of damage or grime on your tanks during their journey. Below is information and NET Pricing on our premium packaging services.

Tank Size (Gals)	PN
Palletize tank from 0-300	272-34396
Palletize tank from 301-500	272-34397
Palletize tank from 501-1,000	272-34398
Palletize tank from 1,001-1,500	272-34399
Palletize tank from 1,501-3,000	272-34400
Palletize tank from 3,001-5,000	272-34401
Palletize tank from 5,001-8,400	272-34402
Palletize tank from 8,401-12,000	272-34403
Palletize tank from over 12,000	272-34404

Shipping and Packaging of Your Tank

Heat-Shrink Wrap

Heat-Shrink Wrap is a heavy mil plastic that we wrap the entire tank in and use a flame torch to shrink it tight to the tank exterior. This is the same material used to wrap boats and other valuable equipment being shipped by truck or rail. Prices are NET.

Tank Size (Gals)	PN
Heat-Shrink Wrap 0-750	272-34405
Heat-Shrink Wrap 751-1,500	272-34406
Heat-Shrink Wrap 1,501-3,000	272-34407
Heat-Shrink Wrap 3,001-6,500	272-34408
Heat-Shrink Wrap 6,501-10,000	272-34409
Heat-Shrink Wrap Over 10,000	272-34410

Palletizing is not included in Heat Shrink wrap.
Palletizing must be ordered separately see page 102.
